

TEAM RPG DEV: MARKET RESEARCH

INTRODUCTION

For Milestone 3, our task was to look into market overview of our potential market. That being the market value in the past present and future, competitor analysis, and opportunity assessment.

What we hope to achieve from this research is to understand our market's potential, its value that we will be buying into, and out potential competitors to see where they are succeeding and where they are failing.

MARKET OVERVIEW

After deciding to pivot towards child-parent motivation, it led our team to review which market our application would be classed under. In doing so, we can gain insight on a market that best fits our application along with competitors within the market.

From the research performed we found that our application would best fit under game-based learning. This market involves incorporating game elements, mechanics, and design into activities that helps engage users, enhance motivation and enhance learning outcomes. Our new product is now called Remote Parental Guidance.

MARKET SIZE

The Game-Based Learning market size value in 2024 was at 19.55 billion USD and is forecasted to grow up to 64.54 billion USD by 2030.

Market Growth in prior years leading to 2024 and the years leading up to 2030 have a projected growth of around 20.4% to 22%

MAJOR PLAYERS & MARKET SHARES

Companies that were discovered to be involved in the Game-Based Learning Market ranged from companies such as: Amazon, Google, Kahoot!, Mojang, Epic Games, etc.

amazon

The pie chart of market share by end user, reveals that the the three largest revenue share by sectors are Education, Consumer, and Healthcare & Life Sciences.

01

North America accounts for more than 43.1% of market revenue share in 2023. Map indicates in the color purple the largest market, while different shades of blue indicate the fastest growing markets. Asia is following suit in fastest growing market.

02

Driving factors of market trends trend is due to emphasis on continuous learning, skill development, along with a strong demand for interactive and enaging educational tools

03

Integration of technologies such as **Artificial Intelligence (AI)**, **Augmented Reality (AR)**, and **Virtual Reality (VR)**. These technologies implemented to help create personalized learning paths based upon individual performance and progress , in addition to creating an immersive learning enviornment.

INSIGHT 1

Parents want a tool to assign tasks to their children as well as automate certain chores and aspects

- Help delegate tasks to their children to be productive
- be in charge of reward system
- potentially have the system automate aspects after some time to take a work off the parents

The gamifying aspects should be fun and have proper rewards for good behavior:

- **Reviews of Habitica show users like an engaging in-game activity that necessitates the rewards for good productivity**
- **gives choices for different types of rewards**
- **the game can be a reward in itself**

INSIGHT 2

INSIGHT 3

Users want functional moderation when it comes to social aspects

- **Toxic users contradict the core aspects of a productivity app**

RPG Solution:

- **Parental controls or moderator roles for parental figures**
- **Develop an overall kid-friendly experience**

A reviewer mentioned a lack of moderation forced them to give up Habitica

Many parents like that an app can help teach positive habits

- My First Nest Egg teaches money habits
- Children like completing puzzles and chores for money/rewards
- Habitica enforces accountability

Applying this to RPG, we can research what gamified features children would enjoy (not just puzzles)

- avatars
- leveling
- cosmetics

CONCLUSION

Gap Analysis: Solution to User Engagement

- Our choice to focus on the integration of gamification gives us a distinct identity that sets us apart from other apps with similar goals
- If we keep the balance between gamification and productivity we have a chance to join a quickly growing game based learning market with a unique product
- We have various monetization avenues such as third party collaboration, parental rewards, and buy in premiums
